DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 23-33, 95-111, 141-151, 300-311, 335-370, 461-491, 496-531 are rejected under 35 U.S.C. 102(b) as being anticipated by JP05194224 (applicants' mistakenly submitted pat' 224 rather than '225) or 05194225 by Oishi et al. It is noted that the claimed language as presented reads on the references since "comprising" is an open-ended term.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 23-180, 300-398, 461-559 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP05194224 or 05194225 by Oishi et al. optionally in view of pat' 5,447,918 by McCullough or pat' 5,792,473 by Gergely et al.

The two primary references teach anti-ulcer composition containing benzimidazoles with buffer . The secondary references teach that adding antifoaming agent or/and flavoring agent in a pharmaceutical composition are conventional rendering the claims unpatentable.

4. Claims 181-299, 399-460, 560-621 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP05194224 or 05194225 by Oishi et al. optionally in view of pat' 5,447,918 by McCullough or pat' 5,792,473 by Gergely et al. in combination with JP0525508 or JP 05294831.

The two primary references teach anti-ulcer composition containing benzimidazoles with buffer. The secondary references teach that adding antifoaming agent or/and flavoring agent and/or coated with one or more layers formed on the core part in a pharmaceutical composition are conventional rendering the claims unpatentable.
